

RBM10HV Round bending machine

Features

1. Shafts are hardened with special steel material
2. Rollers are special steel material hardened and grounded
3. The casting machine body makes the round bending machine RBM10 more durable
4. The mold wheel is made of high-quality carbon structural steel and driven by the nether two axles
5. The round bending machine can be combined with various mold wheels in order to meet various processing demands.

Technical Specifications

Modèle	RBM10	ERBM10HV
Moteur	-	1.1 kW
Dimensions d'emballage (cm)	50x48x68cm(corps) 87x77x34cm(support)	950x700x1400cm
Poids Net/Poids Brut (kG)	153/170KGS	230/270KG
Capacité	Dimensions	Diamètre Min.(mm)
	20X5 30X10	190 500
	20X5 50X10	160 400
	10X10 20X20	160 500
