

W11S-25X2500 Universal hydraulic roller

W11S Universal hydraulic roller machine, sheet rolling machine, metal sheet rolling machine

1. Coil plate into different sharps such as cylindrical form, conic form and arc, it adopted Japan hydraulic technical
2. Top roller can do vertical and level motion, up and down, parallel translation is display
3. Upper roll can move in vertical and level include pre-bending function
3. Adopted many points to lubricate Universal Plate Rolling Machine
4. Mechanical, hydraulic, electricity all system set over loading protect device
5. Fitted quality CNC system fault check itself automatically, error give an alarm, mistake protection and so on pipe bener
6. Adopt hand switch button box easily operate Universal Plate Rolling Machine
7. Simple foundation equipment, it can move to operate

W11S Universal hydraulic roller machine, sheet rolling machine, metal sheet rolling machine

Model W11S	Max rolling thickness	Max pre-rolling thickness	Plate width	Diameter of upper roller	Main motor power
	(mm)	(mm)	(mm)	(mm)	(kw)
12*2000	12	10	2000	250	5.5
