### M1463 – Universal

M14 series cylindrical surface grinder is suitable for grinding outer/inner surface of cylinder and taper. The longitudinal movement of the worktable is driven by hydraulic or by handwheel, the worktable can rotate to a certain degree so as to be suitable for grinding taper. The wheelhead cross feed is driven by hydraulic, which realizes automatic periodical feed and rapid feed. It can also do rough and fine feed through handwheel. M14 series universal cylindrical grinder has internal grinding apparatus, internal grinding spindle is supported by precise rollbearing. The workhead spindle, wheelhead spindle, internal grinding spindle, coolant pump, hydrodynamic and hydrostatic oil pump are driven by separate motors. The spindle of M1450 series is supported by hydrostatic and hydrostatic lubrication, its movement on low speed is smooth. The spindle of M1450 series is supported by hydrostatic and hydrodynamic bearing of high rigidity, it makes the spindle have high rotary accuracy and perfect rigidity. The wheelhead of the universal type (M1450) adopts inverter motor to realize stepless speed changing. The wheelhead spindle of the universal type (M1450) adopts sliding bearing structure. The clearance of the front bearing can be adjusted to make it suitable for the grinding use center or chuck. The workhead of the universal type can be rotated to any position within its counterclock direction 90 degrees so it can be suitable for grinding inner or outer surface of taper.

*Each moving part of the machine has electric, hydraulic and mechanic interlock structure. The machine is well designed with pleasing appearance, all control levers are centralized in panel, making operation easy.*

*The wheel dresser can be assembled on the worktable surface or on the tailstock.*

*There are many different distances between the centers for choice.*

#### **Standard accessories:**

- (1) complete set of electrical equipment (2) coolant equipment (3) wheel periphery dresser (4) wheel flange (5) wheel balancing arbor (6) leveling wedge  
(7) open type steady rest (8) carbide tipped center

#### **Optional accessories:**

- (1) wheel balancing stand (2) magnetic separator (3) center grinding attachment  
(4) close type steady rest (5) end wheel dresser (6) radius wheel dresser
